VISUAL WORKFORCE

Speed to Value

Start Generating Insights About Your Workforce In As Little As Two Days

Unrivaled Speed to Value

We've put in the work up front, so you don't have to. Skills management initiatives don't need to be six-month projects – leverage out-of-the-box skills libraries, a powerful survey engine, and pre-built visualizations to get up and running in no time.
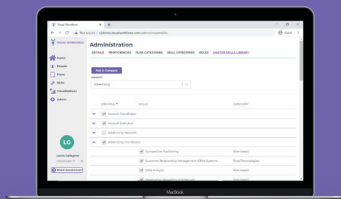

Master Skills Library

Survey Engine

Intuitive Visualizations

No Need to Start from Scratch

Visual Workforce's Master Skills Library puts thousands of industry-specific job roles and associated skills at your fingertips – making it quick and easy to get started.
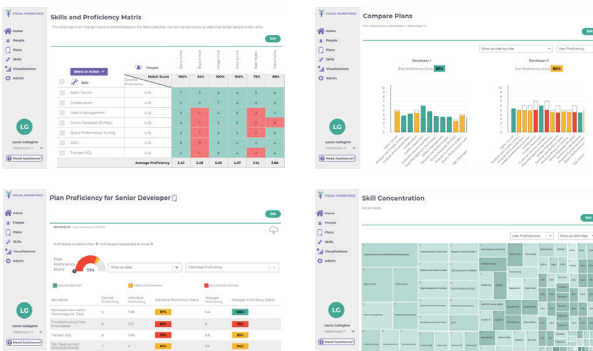

"The library gave us a huge head start when defining our job roles."

Spend Time on What Really Matters

Eliminate the manual work required to track and catalogue skills. Spend more time leveraging insights and running your business, and less time updating data in Excel.

Built to scale: Survey thousands of employees with just a few clicks – and send reminders to laggards at the touch of a button.

Get a 360° view of your workforce: Take advantage of both employee self-assessments and manager ratings to quickly build a trusted view of employee skills and proficiencies.

Transform Raw Data into Powerful Insights

Answers in seconds: Data automatically flows into pre-built visualizations designed to answer tough, real-world questions about people and skills.

Zero learning curve: Our visualizations are designed for managers and HR professionals, not data scientists.

Let us show you how easy it is to get started.
